BEGINNING THE TEST

Once you log in, click on "Start diagnostic" to begin.

Read instructions carefully and complete the

first test as soon as possible.

There are 4 tests in total, so take your time and remember to have a break in between.

Diagnostic instructions

This diagnostic is a quick test to figure out what maths you already know. Try your best, but don't worry if you don't know the answer, it's about what you already know!

Use working paper
Use a spare piece of paper if you need to work something out

Skip if you don't know
If you don't know how to work out the answer, just skip the question

Don't get help from friends
We want to find out what you know, not others in your class

No calculator needed
If you are allowed a calculator to complete a question, one will appear on screen.

COMPLETING TEST 2, 3, AND 4

An email has been sent to you with 3 codes, used for logging in back to the test.
Use them in sequence.

E.g., you receive:

1. 12345
2. 45723
3. 23452

Use 12345 before 45723, and use code 45723 before 23452.
