

THIS IS
UNI WITHIN YOUR REACH

YEAR 10 GUIDE

THIS IS
GRIFFITH
COLLEGE

DON'T STRESS ATAR WONT DEFINE YOUR NEXT STEPS

University can feel like a big leap, But you don't have to do it the traditional way. There are many ways to get there, and the most important thing is finding the path that fits your goals and will best set you up for success.

At Griffith College, there are options even if you don't get the scores you hoped for, if you discover after subject selection that you didn't study the "right" subjects, or if you want a transition between school and uni that feels more supportive and personal.

Our programs are designed to help you build confidence, develop academic skills, and transition into university with support built in.

The key thing to remember is that there's no need to be stressed about your results all through senior, or feel like doors are closing. There is a great option available, one that meets you where you are, and supports you every step of the way.

A MORE SUPPORTED START TO UNIVERSITY

Our mission is to get you to your dream degree without delay, regardless of the subjects you studied in year 11 and 12 and your results.

SMALL CLASS SIZES

Forget massive lecture halls. You'll be in classes of about 30 students, where your teacher actually knows your name. It's a great adjustment between school and uni.

LEARN "HOW TO UNI"

We include our unique Academic and Professional Skills Development course to teach you exactly how to research, write, and reference at a university level.

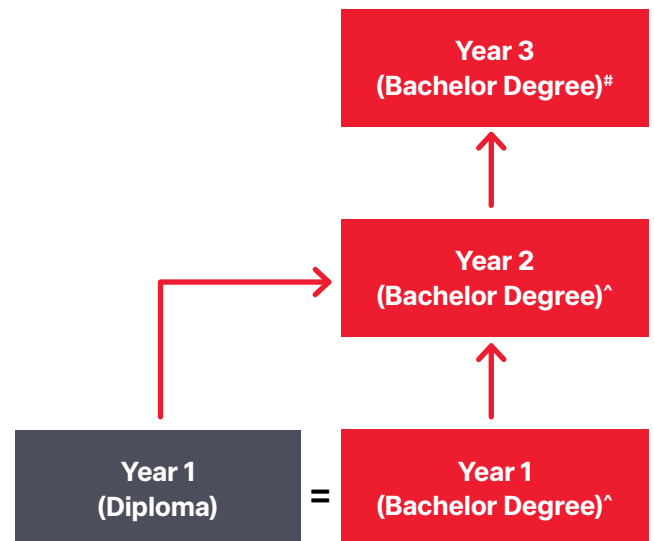

NEED SOME MATHS HELP?

If your dream degree needs strong maths (like engineering, science or health programs), we offer a free Core Maths Skills course to refresh your knowledge before you start adding the harder maths and science.

ONE OFFER, TWO DEGREES

You can apply for a "packaged offer", which means you get one single offer for both your diploma and your university degree at the same time.

Griffith College diplomas mirror the first year of a Griffith University bachelor's degree, but they are designed specifically to help you succeed.

Our university level diplomas offer entry into a range of bachelor programs at Griffith University - often with a full year of credit. This means you could start in the second year of your degree after just one year with us.

#Some bachelor degree programs are more than three years' duration.

^One year of credit may not be wholly applicable to the first year of the relevant bachelor's degree. Refer to program specific information pages online.

STUDY THAT MEETS YOUR INTERESTS

Not sure what degree you want yet? That's okay! Pick an area you're curious about. Each of our 11 diplomas is a "gateway" that can lead to over 60 different bachelor degrees.

BUSINESS AND TOURISM

If you enjoy making decisions and thinking big, this pathway can lead to a wide range of career opportunities. Explore studies in business, commerce, political science or tourism management.

DESIGN

For the creatives. This can be your way into architecture, visual arts, game design, animation or film production

ENGINEERING

For the problem solvers. There are so many areas you can specialise in, from civil, electrical, environmental, mechanical, or software.

HEALTH SCIENCE

Interested in helping people feel, move and live better? Allied health and medical science let you turn care and curiosity into a meaningful health career.

SCIENCE

Science at school is just a taster, at uni you can really lean into the exact part of science you love. Options from biomedical to environmental science, forensics to marine biology.

CRIMINOLOGY AND LAW

Ready for a career preventing crime and promoting justice? This could be your start as a future lawyer, working in corrective services or with the police.

EDUCATION

For the future teachers. Your way into a career in teaching if you don't meet General Maths or English requirements.

HEALTH CARE

For the future registered nurses, this is the pathway you need!

INFORMATION TECHNOLOGY

For the digital thinkers and tech creators. This is your start to careers in cyber security, computer science or information technology.

SOCIAL AND PSYCHOLOGICAL SCIENCE

Drawn to understanding people and making a positive difference? Open to the door to psychology, social work, human services or counselling an focus on supporting individuals, families and communities where it matters most.

WHAT OUR STUDENTS SAY

"When I didn't get the marks in high school that I needed, Griffith College opened their arms to me.

In the small classes you get one-on-one time with you teacher and they can really track and support your progress. They can see in real time if your struggling with a concept and can help on the spot to keep you on track."

Meg G.
Diploma of Engineering graduate

Tennessee S.
Diploma of Educational Studies

Kate A.
Diploma of Health Sciences

Ashlinn R.
Diploma of Educational Studies
